

**REPÚBLICA DE MOÇAMBIQUE  
MINISTÉRIO DOS RECURSOS MINERAIS E ENERGIA  
GABINETE DO MINISTRO**

**8<sup>th</sup> EDITION  
MOZAMBIQUE GAS & ENERGY SUMMIT  
27 – 28 September 2023**

Ladies and Gentlemen,

The Ministry of Mineral Resources and Energy announces its support of the 8th edition of the Mozambique Gas & Energy Summit & Exhibition (also known as the Mozambique Gas Summit), to be held from 27 to 28 September, in Maputo, at the Joaquim Chissano Conference Centre.

Mozambique holds considerable natural gas reserves, produces and exports Liquefied Natural Gas (LNG) since 2022, and has high potential for renewable energies, including hydro, solar and wind, positioning itself as a provider of sustainable energy in the country and the region.

The Summit and Exhibition has been, since its inception, the main platform in Mozambique to exchange ideas and explore partnerships, with the main objective of developing Mozambique's energy sector, as well as power opportunities for companies.

The event in September 2023 will discuss opportunities for energy development, and how the mineral resources and energy sector can consolidate sustainable energy development and opportunities.

Therefore, we invite all interested parties to participate in this conference, which will be attended by specialists from various sectors.

Thank you for your continued cooperation.

**The Minister**

**Carlos Joaquim Zacarias**
