Ministry of Mineral Resources and Energy

7th EDITION OF MOZAMBIQUE GAS & ENERGY SUMMIT

14 – 15 September 2022

Ladies and Gentlemen,

The Ministry of Mineral Resources and Energy endorses the seventh edition of the Mozambique Gas & Energy Summit & Exhibition (known as the Mozambique Gas Summit), taking place 14 – 15 September, in Maputo, at Joaquim Chissano Internacional Conference Center.

Mozambique is currently at a crucial phase of its gas and energy projects development and, considering the current global outlook, the country is extremely well positioned to be a premier global partner and supplier of energy to the world. Additionally, new clean energy and power projects are being implemented which will have a transformational impact in-country and in the region. Finally, the 6th Licensing Round is well underway with exciting prospects to enhance the country's future energy matrix.

The Summit & Exhibition will, once again, act as the main platform in Mozambique for both national and international Government officials, business leaders, investors, service providers as well as local businesses and SMEs to network and exchange ideas, with the aim of developing and identifying new opportunities within the energy sector of Mozambique. I would like to actively encourage all companies and stakeholders involved in Mozambique's energy sector, or those seeking opportunities within it, to attend and participate in this critical industry's event.

MIREME, along with key event partners and supporters from the government of Mozambique, looks forward to welcoming in September delegates and participants at this important event to discuss the exciting opportunities for collaboration and to progress all energy related projects in Mozambique.

I look forward to delivering a Ministerial Keynote Address on the 14th September 2022, highlighting the plans and priorities of MIREME to boost Mozambique's energy sector.

Thank you for your continued cooperation,

Maputo, 10 August 2022

The Minister

Carlos Joaquim Zacarias
